

The Base System Builder has successfully generated your embedded system!

Click the Finish button to return to XPS to compile your hardware system and software application.

```
C:\localhome\elliottng\script\example\addereX\addereXxps2\system.mhs
C:\localhome\elliottng\script\example\addereX\addereXxps2\data\system.ucf
C:\localhome\elliottng\script\example\addereX\addereXxps2\etc\fast_runtime.opt
C:\localhome\elliottng\script\example\addereX\addereXxps2\etc\download.cmd
C:\localhome\elliottng\script\example\addereX\addereXxps2\system.mss
C:\localhome\elliottng\script\example\addereX\addereXxps2\TestApp_Memory\src\TestApp_Me
```

Save settings file:

C:\localhome\elliottng\script\example\addereX\addereXxps2\system.bsb

The settings file contains all the user's selections and inputs in the wizard session. It can be loaded in a future wizard session.
