I would like to create a system for a custom board

Board description

This board utilizes a Xilinx Virtex-II Pro FPGA XC2VP70-FF1517-6C. This XBD enables: 4 LEDs, 2 Hex Displays, 1 Reset Button, 4 Push-Buttons, SystemACE CompactFlash MCU interface, UART, 2 256kx32b ZBT SRAMs, Ethernet & OneWire EEPROM. It also includes support for the 4-slot radio controller and radio bridge peripherals.
