

The following external memory and IO devices were found on your board:

Rice University CMC - WARP Project WARP FPGA and Radio Boards Revision 1.0b

Please select the IO devices which you would like to use:

IO devices

DIPSWs_4Bit

Peripheral: OPB GPIO

Use interrupt

Data Sheet

RS232

Peripheral: OPB UARTLITE

Baudrate (bits
per seconds):

57600

Data bits:

8

Parity:

NONE

Use interrupt

Data Sheet

SysACE_CompactFlash

Data Sheet
