

The simple Memory Test application will illustrate system aliveness and perform a basic read/write test to your memory devices.

#### MemoryTest

Select the memory devices which will be used to hold the following program sections:

Instruction: iocm\_cntrl

Data: docm\_cntrl

Stack/Heap: docm\_cntrl

Boot section resides in iocm\_cntrl

#### WARNING

If you have placed the Instruction or Data section of this program in an external memory, you must use a debugger, bootloader, or ACE file to initialize memory before you can run this program!
